

Early Childhood Prevention & Treatment Program for Behavioral Health

The *Early Childhood Prevention and Treatment Program for Behavioral Health* aims to address the unique mental and behavioral health needs of at-risk young children (ages 0-5) and their caregivers by providing *Early Childhood Enhanced Care Coordination* through the state's two Care Management Entities (CME), NFI North Inc. and Connected Families New Hampshire. The CMEs provide a modified version of the evidence-based practice of NH Wraparound; providing support to families in figuring out what their strengths and needs are and then supporting the family in connecting with appropriate supports in their communities.

Who is eligible? Children aged 0-5 and **their** caregivers

Dual Eligibility Criteria:

- ◆ **Children** who may already have a mental health diagnosis or who have mental health or behavioral concerns, and/or
- ◆ **Caregivers** who are dealing with their own mental health issues, have current/past substance use, are in recovery, have had a history of their own adverse experiences in childhood, have other systems involved with the family such as DCYF and/or there are concerns for abuse/neglect

What services can you expect along with Enhanced Care Coordination/Wraparound?

All services are based on child/caregiver needs and can include referrals to:

- ◆ *Child-Parent Psychotherapy* or other mental health services
- ◆ *Home visiting* programs, parent education programs
- ◆ *Family Centered Early Supports and Services*
